About Eupraxia

Eupraxia is a clinical-stage biotechnology company focused on the development of locally delivered, extended-release alternatives to currently approved drugs. Each of Eupraxia's product candidates has the potential to address therapeutic areas with high unmet medical need and strives to provide improved patient benefit by delivering targeted, long-lasting activity with fewer side effects.

Eupraxia's lead product candidate, EP-104IAR, is currently in Phase 2 development for the treatment of pain due to OA of the knee. In addition to EP-104IAR, Eupraxia is developing a pipeline of earlier-stage long-acting formulations. Potential pipeline candidates include a range of drugs for indications such as post-surgical pain (EP-105), and post-surgical site infections (EP-201), each designed to improve on the activity and tolerability of approved drugs. Eupraxia is also developing a formulation of EP-104IAR for use in canine and equine OA.
